

Washington Death with Dignity Act

As a LifeCare™ senior living community, Timber Ridge falls under the provision of the Act. Timber Ridge is committed to improving end of life care for residents, including effective pain and symptom management, palliative care, and access to hospice care. In accordance with this commitment, it is our policy that Timber Ridge will not assist a resident to end his or her life under Washington's Death with Dignity Act. However, Timber Ridge will allow a resident who wishes to self-administer a lethal medication under the Act to remain on our premises throughout the dying process. Timber Ridge will allow representatives of organizations such as Compassion & Choices of Washington onto the Timber Ridge campus to partner with those residents who wish to participate in the Act.
